- Advise veterans to submit all forms to the **DSO or a VFW accredited representative** for completion.

- Why is this form important?
  - If a veteran wants to file a claim but needs additional time to gather the information needed to file, an Intent to File form should be used.
  - VA stopped accepting Informal Claims on March 24, 2015 and now they must complete an Intent to File on a [VA Form 21-0966](#).
  - VA may grant entitlement to benefits from an effective date prior to the date of claim (DOC) as long as the claimant submits a complete claim within one year of the date VA received the ITF.
  - An ITF is specific to the benefit sought. When the claim received is not for the same type of benefit identified on the ITF, the ITF may not be applied to the claim for purposes of effective date assignment.

# Ways VA Can Grant Service Connection

- Service connection for a disability or death can be established in many ways.
  - Direct Service Connection
  - Presumptive
  - Aggravation
  - Secondary
  - Aggravation of non-service-connected disability
  - “As if”

# Direct Service Connection

- Evidence is in the service records and the three elements below are met
  - A current disability
  - An event, injury, or disease in service, and
  - A link or nexus establishing that the current disability had its onset or inception in service, which may be established by evidence of
    - chronicity and continuity, or
    - continuous symptoms or a medical nexus opinion.
  
- Reference: [38 CFR 3.303](#) and [M21-1 Section V.ii.2.A.](#)

# Presumptive Service Connection

- VA presumes that certain disabilities were caused by military service if the Veteran meets a certain criteria.
  - Relaxes the burden on the Veteran to prove that disability is related to service.
  - Congress and VA have decided that service-connected compensation should be awarded for a number of diseases which appear after service for all veterans that meet certain conditions of service, even if there is no record of an event or disability in their particular military service records.
  - Diseases or conditions subject to presumptive service connection (SC) will be considered to have been incurred in or aggravated by service if manifested to a compensable level within the time frame specified for that certain disease under the regulation, even if there is no evidence of such disease during service.
- Reference: [38 CFR 3.307](#) and [M21-1 Section V.ii.2.B.](#)

# Aggravation of preservice disability.

- Disability is not caused by military service, but is made worse by military service or by a service-connected disability
  - Preexisting condition is worsened, beyond natural progression, by a service-connected condition.

- Reference: [38 CFR 3.306](#) and [M21-1 Section V.ii.2.C.](#)

# Secondary Service Connection and Aggravation of Non-Service-Connected (NSC) Disabilities

- Service-connected condition causes another rated disability
  - Secondary Service Connection
    - Service-connected disability causes another disability
  - Non-Service-Connected Disability
    - Rating a non-service-connected condition requires a medical professional to establish baseline – severity of condition if service-connected condition wasn't making it worse.
    - The Veteran will be compensated for the difference between the baseline and current severity
  
- Reference: [38 CFR 3.310](#) and [M21-1 Section V.ii.2.D.](#)

# “As If” Service Connected

- Veteran can receive compensation but may not be eligible for all ancillary benefits that normally come along with service-connected disability.
  - Paired Organs
    - Service-connected disability (usually loss of or loss of use) of certain organs and extremities and
    - Non-service-connected disability of the paired organ or extremity (hand, feet, eyes, ears, kidney and lungs.)
    - Both organs or extremities will be treated as service connected for determining service-connection
  - Compensated Work Therapy or Rehabilitation
    - If Veteran is participating in program and suffers an additional disability
  - VA Fault or Negligence (1151 claim)
    - Medical malpractice claim when the Veteran suffer an additional disability or death and it was not reasonably foreseeable and is due to negligent VA medical care.
    - A medical opinion is required that states it was not reasonably foreseeable and is due to negligence of the VA
- Reference: [38 CFR 3.383](#) and [M21-1 Section VIII.iv.7.A.](#) And [38CFR 3.361 under 38 U.S.C. 1151](#)

# Compensation – VA Math Concept

**VA does not add disability ratings together, rather they combine the disabilities using the combined ratings table**

To help understand the concept of VA Math, think of a sale:

- A shirt costs \$100 regular price
- The store advertises 50% off – The new price is \$50
- The store offers a coupon for an additional 50% – New price is \$25 you save 75% total
- Why? Because you take the additional percentage from what's left of the original price
- The veteran is the original price, the disabilities are the sale, and the total saved is the combined rating
- [Combined Rating Table](#)

- 50% for Sleep Apnea
- 30% for PTSD
- 20% for Lumbar Spine
- 10% for Tinnitus
- $100\% - 50\% = 50\%$ 
  - $50\% * 30\% = 15\%$
- $50\% + 15\% = 65\%$ 
  - $35\% * 20\% = 7\%$
- $7\% + 65\% = 72\%$ 
  - $28\% * 10\% = 2.8\%$
- $72\% + 2.8 = 74.8\%$
- Rating is 80%
